

# Real Life Design

This is how we do it.

Almost any fabric can be laminated – you just need to know where to send it. To protect this Brule & Cie fabric on chairs used everyday, **the seats and backs have been laminated** in a matte finish to keep the chairs clean and looking new.

Choose a **table made from a hardwood**, like yew, with a "French Polish" finish for longer wear and better camouflage of scratches and watermarks.

Nothing will last longer or look better than a well-finished hardwood floor with a colorful, **heavy weight wool rug**. The **more color, pattern and texture**, the better your rug will be at hiding stains and wear. If you put a rug under your dining table, these are the rules to live by.
